FOREST FIRES

Prevention and staying safe

Half of all fires are caused by carelessness

**No fires
No barbecues**
near forested areas

No smoking
in forests, and never throw
cigarette butts on the floor or
out of car windows

**No work
that causes sparks**
on high-risk days

**Do not store fuel
sources next
to your house**
(wood, oil, gas, etc.)

**If you see
the beginnings
of a fire,
sound the alert
and give a precise
location of the fire**

**Stay
at home**
your home
is your best
shelter

ALWAYS FOLLOW INSTRUCTIONS FROM AUTHORITIES
