BUILDINGS AND CLIMATE

Global Forum

Pre-program

Paris, March 7-8 2024

GOUVERNEMENT

*Liberté
Égalité
Fraternité*

Date: 7-8 March 2024

Location: Palais des Congrès, Paris, France

Format: Only in-person.

Access to the Forum : invited and accredited persons only

Language: English only for all the sessions on 7 March. English-French translation is available for the Ministerial sessions on 8 March.

Organisers: Government of France and United Nations Environment Programme (UNEP), with the support of the Global Alliance for Buildings and Construction (GlobalABC)

Participants

This event is **by invitation only** and aims to bring together invited participants, including ministers, national and sub-national governments, various actors of the value chain (Investors & asset managers, property developers, insurers & reinsurers, product manufacturers, Architecture, engineering and construction actors, property & facility managers, academia, philanthropists, etc.) and international organisations engaged in the decarbonisation and resilience of the buildings sector.

Contacts for the event

Event description

The Buildings and Climate Global Forum, co-organised by France and the United Nations Environment Programme (UNEP), with the support of the Global Alliance for Buildings and Construction aims to gather for the first time ministers and high-level representatives of key organizations, to initiate a new impetus in international collaboration for building decarbonisation and resilience after the Conference of the Parties (COP) 28.

During two days, this Forum will provide a unique **opportunity to engage with ministers** in charge of decarbonisation and resilience of the buildings, real estate, and construction sectors **from all world regions**.

High-level representatives and experts of **key stakeholder organisations** will be invited, across the entire buildings sector value chain, including local authorities, NGOs, and businesses.

Many sessions on key topics, CEO and ministerial roundtables, plenary meetings, solution exhibitions, and pitches will provide the opportunity to exchange, network and work together. Governments will be invited to endorse **a common declaration** outlining common principles and cooperation framework for global efforts to achieve decarbonisation and climate change resilience in the buildings sector. All stakeholders of the buildings sector will be invited to disclose **specific engagements to support the Forum's ambition**.

Outcomes

- Governments will be invited to endorse a joint statement "Déclaration de Chaillot", setting common principles and a cooperation framework
- All stakeholders of the buildings sector will be invited to disclose specific engagements (i.e. commitments and contributions)
- Organisations and stakeholder groups will be invited to disclose priority actions, e.g., for governments, Buildings Breakthrough priority actions for 2024.
